Subject Index for Volumes 172–174

50 K anomaly
  neutron diffraction studies of domain growth associated with the 50 K anomaly in Pd–D, 169

A15 structure
  Mössbauer study of the hydrides of Nb_3Me with A15 structure, 358
Absorption
  absorption of hydrogen by vanadium-rich V–Ti-based alloys, 64
  absorption of hydrogen in superlattices studied by the $^{15}N(^1H, \alpha\gamma)^{12}C$ reaction, 776
  calorimetric enthalpies of absorption and desorption of protium and deuterium by palladium, 42
  characteristics of hydrogen absorption and reactivation of $TiMn_{1.25}Cr_{0.25}$ alloy, 1044
  comparison of the hydrogen absorption process in as-quenched and relaxed $Zr_{50}Ni_{50}$ glassy ribbons, 899
  effect of hydrogen absorption on the structural properties of the hyperstoichiometric alloys $Zr(Mn_{0.72}Fe_{0.28})_{2+x}$, 183
  effect of O_2, N_2 and CO impurities on the H_2 absorption rate of Ti films at 300 K, 824
  hydrogen absorption–desorption properties of UCo, 71
  hydrogen absorption/deposition studies on some giant magnetostrictive $REFe_2$ alloys and their powder metallurgical processing by hydrogen decrepitation, 1285
  reaction kinetics of H_2 absorption by lanthanum with and without surface oxide layers, 832
  effect of the partial replacement of nickel in $LaNi_5$ hydride with iron, cobalt, and copper on absorption and desorption kinetics, 1009
Activation
  surface processes of H_2 in the initial activation of $LaNi_5$, 983
Adsorption
  autocatalytic tritium adsorption in niobium and tantalum at room temperature, 1345
Aluminium
  effects of radiolytic tritium decay on the thermodynamic behaviour of $LaNi_{4.25}Al_{0.75}$ tritides, 1352
  hydrogen surface interactions on clean and on oxidized polycrystalline aluminium and Al 5083 alloy, 859
  influence of superconductivity on quantum diffusion of the positive muon in aluminium, 759
Amorphous powders
  formation of metal hydride powders and metal–hydrogen amorphous powders of mechanochemical reaction, 153
Anelastic relaxation
  anelastic relaxation due to hydrogen and deuterium in disordered and ordered Pd_3Mn, 254
Applications
  metal hydride practical applications, 943

Barium
  hydrogen in YBaCuO films, 419
  preparation and properties of compounds of the complex metal oxides Y_2BaMO_5 ($M \equiv Cu, Zn$) with added hydrogen, 433
  static and dynamic dilatation of the high-T_c superconductor $EuBa_2Cu_3O_{7-\delta}H_x$, 425
Batteries
  cyclic behaviour of metal hydride electrodes and the cell characteristics of nickel–metal hydride batteries, 1227
  influence of binding materials for shaping alloy electrodes on the performance of a Ni/metal hydride battery, 1185
  nickel–metal hydride battery using microencapsulated alloys, 1194
  rare-earth-based alloy electrodes for a nickel–metal hydride battery, 1175

Bauer–Schlünder model
effective thermal conductivity in hydride packed beds
I. Study of basic mechanisms with help of the Bauer and Schlünder model, 1147
Beryllium
crystallographic studies of compounds from the $LiH + BeH_2$ system, 213
Binding materials
influence of binding materials for shaping alloy electrodes on the performance of a Ni/metal hydride battery, 1185
Boron
Hydridation of $Re_2Fe_{14}B$ compounds (Re ≡ Nd, Ce, Y, Gd), 144
hydrogen: its use in the processing of NdFeB-type magnets, 1273

Caesium
solubility of hydrogen in CsCl-type group Ib–erbium alloys XEr (X ≡ Cu, Ag, Au), 136
Calcium
magnetic properties of $Ca_{2-x}Eu_xRuH_6$ studied by electron paramagnetic resonance, 459
Catalysis
catalytic effect of nickel, iron and palladium on hydriding titanium and storage materials, 1076
effects of pretreatments on the catalytic activities of hydrogen storage intermetallics, 1084
Cathode
in situ observation of deuteride formation in palladium foil cathode by X-ray diffraction method, 1381
Ceramics
inelastic neutron scattering investigation of hydrogen sites in $Y_5Si_3H_x$ ceramics, 307
Cerium
lattice dynamics of non-stoichiometric cerium deuteride, 231
on unstable magnetic ordering in Ce 3d compounds and their hydrides, 451
Chemical bonding
chemical bonding of hydrogen molecules to transition metal complexes, 475
Chlorine
solubility of hydrogen in CsCl-type group Ib–erbium alloys XEr (X ≡ Cu, Ag, Au), 136
Chromatographic column
flow in a metal hydride chromatographic column, 1338
Chromium
chartacteristics of hydrogen absorption and reactivation of $TiMn_{1.25}Cr_{0.25}$ alloy, 1044
Cobalt
hydriding kinetics of $TiFe_{0.5}Co_{0.5}$ compounds, 1052
hydrogen absorption–desorption properties of UCo, 71
Mössbauer study of hydrides and deuterides of iron and cobalt, 333
effect of the partial replacement of nickel in $LaNi_5$ hydride with iron, cobalt, and copper on absorption and desorption kinetics, 1009
Colouration
colouration of oxidized niobium surfaces by electrochemical hydrogen charging, 851
Compacts
metal hydride compacts for hydrogen isotope separation, 1313
thermal conductivity of porous metal matrix hydride compacts, 1138
Composition
some pressure–composition and electrical resistivity–composition relationships of the Pd–Sc–H system, 160
Copper
^{57}Fe Mössbauer study of the hydrides of Ni–Cu alloys, 343
comparison of hydrogen diffusion in Ti_2PdH_x with the behavior for Ti_2CuH_x and Zr_2PdH_x, 643
effect of thin copper films on hydrogen permeation through iron, 732
hydrogen in YBaCuO films, 419
hydrogen internal friction peak and thermal desorption spectrum in amorphous $Cu_{50}Zr_{50}$, 908
preparation and properties of compounds of the complex metal oxides Y_2BaMO_5 (M ≡ Cu, Zn) with added hydrogen, 433
static and dynamic dilation of the high-T_c superconductor $EuBa_2Cu_3O_{7-\delta}H_x$, 425
cycling behaviour of mischmetal–nickel-based metal hydride electrodes and the effects of copper plating on their performance, 1265
Czochralski hydrogen compressor copper in crystal growth, 936

effect of the partial replacement of nickel in $LaNi_5$ hydride with iron, cobalt, and copper on absorption and desorption kinetics, 1009
Crystal field
proton nuclear magnetic resonance study of crystal field levels in praseodymium hydrides, 366
Crystal growth
Czochralski hydrogen compressor copper in crystal growth, 936
Crystallographic studies
crystallographic studies of compounds from the $LiH + BeH_2$ system, 213
Current density
relation between discharge capacities and discharge current densities of hydride electrodes, 1260
Cycling
investigation of kinetics and structural changes in $TiFe_{0.8}Ni_{0.2}$ after prolonged cycling, 1036
investigation of $LaNi_5$ after prolonged cycling, 997
Czochralski hydrogen compressor
Czochralski hydrogen compressor copper in crystal growth, 936

Decay
effects of radiolytic tritium decay on the thermodynamic behaviour of $LaNi_{4.25}Al_{0.75}$ tritides, 1352
Decomposition
decomposition kinetics of palladium nickel hydride, 107
Decrepitation
hydrogen absorption/deposition studies on some giant magnetostrictive $REFe_2$ alloys and their powder metallurgical processing by hydrogen decrepitation, 1285
Deformation
Some engineering methods for eliminating deformation and expansion damage of hydride storage containers, 1168
Dehydriding
thermodynamic properties and cyclic hydriding–dehydriding stability of $LaNi_5$ thin films, 799
Density modes
phase diagram and density modes of deuterium in $NbO_{0.02}$, 1
Depolarization
transverse field depolarization rates for muons in metals, 762
Deposition
hydrogen absorption/deposition studies on some giant magnetostrictive $REFe_2$ alloys and their powder metallurgical processing by hydrogen decrepitation, 1285
Depth distribution
deuterium depth distribution in oxidized Zr–2.5wt.%Nb measured by nuclear reaction analysis, 1306
Depth profiling
hydrogenated Fe–Ti superlattices studied by hydrogen depth profiling, Mössbauer spectroscopy and X-ray diffraction, 784
Design
design of a new reactor system for the kinetic study of metal hydrides under isothermal conditions, 959
Desorption
calorimetric enthalpies of absorption and desorption of protium and deuterium by palladium, 42
hydrogen absorption–desorption properties of UCO, 71
Deuteride formation
in situ observation of deuteride formation in palladium foil cathode by X-ray diffraction method, 1381
Deuterides
Mössbauer study of hydrides and deuterides of iron and cobalt, 333
Deuterium
anelastic relaxation due to hydrogen and deuterium in disordered and ordered Pd_3Mn, 254
calorimetric enthalpies of absorption and desorption of protium and deuterium by palladium, 42
deuterium depth distribution in oxidized Zr–2.5wt.%Nb measured by nuclear reaction analysis, 1306
electronic structure and stability of palladium hydrogen (deuterium) systems, $PdH(D)_n$, $1 \leqslant n \leqslant 3$, 1363
interaction between two neighboring deuterium atoms in palladium, 1371
lattice dynamics of non-stoichiometric cerium deuteride, 231
localized modes of hydrogen and deuterium in $NiTiH_x$ and $NiTiD_x$, 319

Mössbauer study of hydrides and deuterides of iron and cobalt, 333
neutron diffraction studies of domain growth associated with the 50 K anomaly in Pd–D, 169
nuclear magnetic resonance studies of hydrogen and deuterium in tantalum, 631
phase diagram and density modes of deuterium in $NbO_{0.02}$, 1
surface effects in the reaction of H and D with Pd-macroscopic manifestations, 867
Diffusion
comparison of hydrogen diffusion in Ti_2PdH_x with the behavior for Ti_2CuH_x and Zr_2PdH_x 643
diffusion of hydrogen in transition metals, 538
diffusion of hydrogen isotopes as a probe to study the atomic microsctructure of metals, 658
electrical resistance studies of hydrogen diffusion in niobium; an old problem revisited, 699
electrochemical measurements of hydrogen diffusion in the intermetallic compound $LaNi_5$, 611
hydrogen diffusion in amorphous Ni–Zr, 922
hydrogen diffusion in f.c.c. TiH_x, 678
hydrogen diffusion in $Nb_{1-y}V_y$ alloys, 624
hydrogen permeation and diffusion in Fe–Ti alloys, 740
influence of the microstructure on hydrogen diffusion in Fe–Zr alloys, 671
nuclear magnetic resonance studies of hydrogen and deuterium in tantalum, 631
nuclear quadrupolar relaxation due to hydrogen diffusion in metal–hydrogen systems, 572
quantum transition state theory and the diffusion of hydrogen in metals, 529
diffusion of hydrogen in disordered and ordered Pd_3Mn as studied using the Gorsky relaxation, 262
diffusion of hydrogen in the A-15 compound Ti_3Ir, 693
Diffusion anisotropy
NMR studies of diffusion anisotropy in metal hydride single crystals, 603
Diffusivity
solubility and diffusivity of hydrogen in palladium and $Pd_{77}Ag_{23}$ containing lattice defects, 747
solubility and diffusivity of hydrogen in amorphous $Pd_{73.2}X_{8.8}Si_{18}$ ($X \equiv$ Ag, Cu, Cr, Fe, Ni) alloys, 890
Dilatation
static and dynamic dilation of the high-T_c superconductor $EuBa_2Cu_3O_{7-\delta}H_x$, 425
Discharge capacity
relation between discharge capacities and discharge current densities of hydride electrodes, 1260
Disordered metal–hydrogen systems
nuclear magnetic dipolar relaxation in disordered metal–hydrogen systems, 579
Dissolution
effects of prior hydrogen dissolution and hydriding on hydrogen solubility in $LaNi_5$, 1018
Domain growth
neutron diffraction studies of domain growth associated with the 50 K anomaly in Pd–D, 169
Dynamics
anomalous hydrogen dynamics in rare earth metals, 496

Electrical resistance
electrical resistance studies of hydrogen diffusion in niobium: an old problem revisited, 699
Electrical resistivity
some pressure–composition and electrical resistivity–composition relationships of the Pd–Sc–H system, 160
Electrochemical hydrogen charging
colouration of oxidized niobium surfaces by electrochemical hydrogen charging, 851
Electrochemical isotherms
electrochemical isotherm measurements on the PD–H and PdAg–H systems, 816
Electrochemical measurements
electrochemical measurements of hydrogen diffusion in the intermetallic compound $LaNi_5$, 611
Electrodes
new pressure–composition–temperature curve application: potential of the MH electrode, 1236
characteristics of electrodes using amorphous AB_2 hydrogen storage alloys, 1205

cyclic behaviour of metal hydride electrodes and the cell characteristics of nickel–metal hydride batteries, 1227
electrode characteristics of C15-type Laves phase alloys, 1211
influence of binding materials for shaping alloy electrodes on the performance of a Ni/metal hydride battery, 1185
rare-earth-based alloy electrodes for a nickel–metal hydride battery, 1175
surface analysis of Ab_5-type electrodes, 1252
cycling behaviour of mischmetal–nickel-based metal hydride electrodes and the effects of copper plating on their performance, 1265
relation between discharge capacities and discharge current densities of hydride electrodes, 1260
Electron paramagnetic reasonance
magnetic properties of $Ca_{2-x}Eu_xRuH_6$ studied by electron paramagnetic resonance, 459
Electron–phonon interaction
calculations of the total energy, electron–phonon interaction and Stoner parameter in the 5d transition metal hydrides, 401
Electronic density of states
magnetic resonance determination of the electronic density of states and the metal–non-metal transition in the LaH_2–LaH_3 system, 411
Electronic properties
hydrogen in magnesium alloys and magnesium interfaces: preparation, electronic properties and interdiffusion, 808
Electronic structure
electronic structure and stability of palladium hydrogen (deuterium) systems, $PdH(D)_n$, $1 \leqslant n \leqslant 3$, 1363
energetics and electronic structure of hydrogenated clusters, 387
nuclear magnetic reasonance survey of hydrogen motion and electronic structure in α-phase (Nb–Mo)–H alloys, 649
Energetics
energetics and electronic structure of hydrogenated clusters, 387
Engineering methods
some engineering methods for eliminating deformation and expansion damage of hydride storage containers, 1168
Equilibrium pressure
control of hydrogen equilibrium pressure for C14-type Laves phase alloys, 1028
Equilibrium pressures
influence of magnetic fields on the hydrogen equilibrium pressures of ferromagnetic hydrides, 79
Erbium
solubility of hydrogen in CsCl-type group Ib–erbium alloys XEr (X≡ Cu, Ag, Au), 136
Etching
effects of etching with HCl on the hydrogen sorption properties of Mg_2Ni, 873
Europium
magnetic properties of $Ca_{2-x}Eu_xRuH_6$ studied by electron paramagnetic resonance, 45
static and dynamic dilatation of the high-T_c superconductor $EuBa_2Cu_3O_{7-\delta}H_x$, 425
Expansion
some engineering methods for eliminating deformation and expansion damage of hydride storage containers, 1168

Ferromagnetic hydrides
influence of magnetic fields on the hydrogen equilibrium pressures of ferromagnetic hydrides, 79
Flow
flow in a metal hydride chromatographic column, 1338
Friction
internal friction of hydrogen in scandium, 522

Gadolinium
comment on "the magnetic and structural ordering in the GdH_{2+x} system" by P. Vadja, J. N. Daou and J. P. Burger, 1388
magnetic and structural ordering in the GdH_{2+x} system, 271

Gas purifiers
application of SAES and HWT gas purifiers for the removal of impurities from helium–hydrogen gas mixtures, 1157
Gettering
gettering of hydrogen from Zr–2.5Nb pressure tubes, 1297
Glasses
muon spin rotation in an Ni–Ti metallic glass hydride, 770

neutron quasi-elastic scattering from hydrogen in zirconium–nickel metallic glasses, 915
thermal desorption spectra of hydrogen from glassy $Pd_{35}Zr_{65}$ and crystalline $PdZr_2$, 928
Glassy ribbons
comparison of the hydrogen absorption process in as-quenched and relaxed $Zr_{50}Ni_{50}$ glassy ribbons, 899
Gold
^{197}Au Mössbauer study of the hydrides of Ni–Au alloys, 351
Gorsky relaxation
diffusion of hydrogen in disordered and ordered Pd_3Mn as studied using the Gorsky relaxation, 262
Graphite
two-dimensional metallic hydrogen lattice in potassium–hydrogen–graphite ternary systems, 20

Hafnium
effect of interstitial oxygen of hydrogen solubility in titanium, zirconium and hafnium, 85
hydrogen in Nb/Hf/Nb and Nb/Ti/Nb thin films, 792
Heat pump
development of a double-stage heat pump: experimental and analytical surveys, 1092
Heat transformer
two-stage metal hydride heat transformer laboratory model: results of reaction bed tests, 1122
Helium
application of SAES and HWT gas purifiers for the removal of impurities from helium–hydrogen gas mixtures, 1157
Hopping dynamics
theory of hydrogen hopping dynamics including hydrogen–lattice correlations, 548
Hydridation
hydridation of $Re_2Fe_{14}B$ compounds (Re ≡ Nd, Ce, Y, Gd), 144
Hydride former
selection of a hydride former for the separation of hydrogen isotopes from inert gases, 1320
Hydriding
effect of surface contaminations on the hydriding behaviour of $LaNi_5$, 841
effects of prior hydrogen dissolution and hydriding on hydrogen solubility in $LaNi_5$, 1018
hydriding kinetics of $TiFe_{0.5}Co_{0.5}$ compounds, 1052
intermetallics V–20Ti and FeTi: a transmission electron microscopy study of hydriding reactions and thermodynamic stability, 1058
kinetics of the hydriding of uranium metal, 116
linear solution for hydriding of uranium, 124
thermodynamic properties and cyclic hydriding–dehydriding stability of $LaNi_5$ thin films, 799
Hydrogen chloride
effects of etching with HCl on the hydrogen sorption properties of Mg_2Ni, 873
Hydrogen isotopes
diffusion of hydrogen isotopes as a probe to study the atomic microstructure of metals, 658
Hydrogen jump geometry
study of the hydrogen jump geometry in an α-$LaNi_5H_x$ single crystal using quasi-elastic neutron scattering, 595
Hydrogen mobility
nuclear magnetic resonance study of hydrogen mobility in Zr_3PD_{3-x}, 618
Hydrogen motion
NMR studies of localized interstitial hydrogen motion in the h.c.p. metals Sc, Y and Lu, 509
nuclear magnetic resonance survey of hydrogen motion and electronic structure in α-phase (Nb–Mo)–H alloys, 649
Hydrogen pressure
relation between equilibrium hydrogen pressure and lattice parameters in pseudobinary Zr–Mn alloy systems, 220
Hydrogen–lattice correlations
theory of hydrogen hopping dynamics including hydrogen–lattice correlations, 548
Hydrogenated clusters
energetics and electronic structure of hydrogenated clusters, 387
Hyperstoichiometric alloys
effect of hydrogen absorption on the structural properties of the hyperstoichiometric alloys $Zr(Mn_{0.72}Fe_{0.28})_{2+x}$, 183

Impurities
application of SAES and HWT gas purifiers for the removal of impurities from helium–hydrogen gas mixtures, 1157
effect of O_2, N_2 and CO impurities on the H_2 absorption rate of Ti films at 300 K, 824
Inelastic neutron scattering
magnetic excitations in Tm–H observed using inelastic neutron scattering, 440
Inert gases
selection of a hydride former for the separation of hydrogen isotopes from inert gases, 1320
Interdiffusion
hydrogen in magnesium alloys and magnesium interfaces: preparation, electronic properties and interdiffusion, 808
Interfaces
hydrogen in magnesium alloys and magnesium interfaces: preparation, electronic properties and interdiffusion, 808
Internal friction
hydrogen internal friction peak and thermal desorption spectrum in amorphous $Cu_{5.0}Zr_{50}$, 908
Interstitial hydrogen
NMR studies of localized interstitial hydrogen motion in the h.c.p. metals Sc, Y and Lu, 509
Iridium
diffusion of hydrogen in the A-15 computed Ti_3Ir, 693
Iron
catalytic effect of nickel, iron and palladium on hydriding titanium and storage materials, 1076
effect of thin copper films on hydrogen permeation through iron, 732
hydridation of $Re_2Fe_{14}B$ compounds (Re ≡ Nd, Ce, Y, Gd), 144
hydriding kinetics of $TiFe_{0.5}Co_{0.5}$ compounds, 1052
hydrogen permeation and diffusion in Fe–Ti alloys, 740
hydrogen: its use in the processing of NdFeB-type magnets, 1273
hydrogenated Fe–Ti superlattices studied by hydrogen depth profiling, Mössbauer spectroscopy and X-ray diffraction, 784
influence of the microstructure on hydrogen diffusion in Fe–Zr alloys, 671
investigation of kinetics and structural changes in $TiFe_{0.8}Ni_{0.2}$ after prolonged cycling, 1036
Mössbauer study of hydrides and deuterides of iron and cobalt, 333
structural and magnetic behaviour of $LeFe_2H_x$, 191
effect of the partial replacement of nickel in $LaNi_5$ hydride with iron, cobalt, and copper on absorption and desorption kinetics, 1009
intermetallics V–20Ti and FeTi: a transmission electron microscopy study of hydriding reactions and thermodynamic stability, 1058
Isotope separation
metal hydride compacts for hydrogen isotope separation, 1313
selection of a hydride former for the separation of hydrogen isotopes from inert gases, 1320
Isotopic exchange
hydrogen isotopic exchange in palladium hydride, 1331

Kinetic energy
kinetic energy of hydrogen in β-V_2H studied by neutron Compton scattering, 301
Kinetics
design of a new reactor system for the kinetic study of metal hydrides under isothermal conditions, 959
investigation of kinetics and structural changes in $TiFe_{0.8}Ni_{0.2}$ after prolonged cycling, 1036

Lanthanum
effects of radiolytic tritium decay on the thermodynamic behaviour of $LaNi_{4.25}Al_{0.75}$ tritides, 1352
electrochemical measurements of hydrogen diffusion in the intermetallic compound $LaNi_5$, 611
investigation of $LaNi_5$ after prolonged cycling, 997
magnetic resonance determination of the electronic density of states and the metal–non-metal transition in the LaH_2-LaH_3 system, 411
reaction kinetics of H_2 absorption by lanthanum with and without surface oxide layers, 832

studies on metal–hydrogen systems (VD_x, NbD_x, $LaNi_5H_x$) using secondary ion mass spectrometry, 95
study of the hydrogen jump geometry in an α-$LaNi_5H_x$ single crystal using quasi-elastic neutron scattering, 595
surface processes of H_2 in the initial activation of $LaNi_5$, 983
effect of the partial replacement of nickel in $LaNi_5$ hydride with iron, cobalt, and copper on absorption and desorption kinetics, 1009
thermodynamic properties and cyclic hydriding–dehydriding stability of $LaNi_5$ thin films, 799
effect of surface contaminations on the hydriding behavior of $LaNi_5$, 841

Lattice
two-dimensional metallic hydrogen lattice in potassium–hydrogen–graphite ternary systems, 20

Lattice defects
solubility and diffusivity of hydrogen in palladium and $Pd_{77}Ag_{23}$ containing lattice defects, 747

Lattice dynamics
lattice dynamics of non-stoichiometric cerium deuteride, 231

Lattice parameters
relation between equilibrium hydrogen pressure and lattice parameters in pseudobinary Zr–Mn alloy systems, 220

Laves phase alloys
control of hydrogen equilibrium pressure for C14-type Laves phase alloys, 1028
electrode characteristics of C15-type Laves phase alloys, 1211

Linear solution
linear solution for hydriding of uranium, 124

Lithium
crystallographic studies of compounds from the $LiH + BeH_2$ system, 213
metallic properties in the series $K_2Pd(II)H_4$, $Na_2Pd(0)H_2$ and $Li_2Pd(0)H_2$ correlated with the stabilization of a formally zero-valent palladium–hydrogen complex, 36

Localized modes
localized modes of hydrogen and deuterium in $NiTiH_x$ and $NiTiD_x$, 319

Low temperature tunnelling
low temperature tunnelling and quantum diffusion of hydrogen in $Nb(NH)_x$, 685

Lutetium
structural and magnetic behavior of $LeFe_2H_x$, 191

Magnesium
hydrogen in magnesium alloys and magnesium interfaces: preparation, electronic properties and interdiffusion, 808
improved hydrogen storage by Mg and Mg–Ni modified by organic compounds, 1064
magnesium hydride for thermal energy storage in a small-scale solar–thermal power station, 1111
Mg–Zn–Ni hydrogen storage alloys, 1071
effects of etching with HCl on the hydrogen sorption properties of Mg_2Ni, 873

Magnetic behavior
properties of rare earth dihydrides as reflected in the magnetic behavior of TmH_2, a van Vleck compound, 293
structural and magnetic behavior of $LuFe_2H_x$, 191

Magnetic excitations
magnetic excitations in Tm–H observed using inelastic neutron scattering, 440

Magnetic fields
influence of magnetic fields on the hydrogen equilibrium pressures of ferromagnetic hydrides, 79

Magnetic ordering
comment on "The magnetic and structural ordering in the GdH_{2+x} system" by P. Vadja, J.N. Daou and J.P. Burger, 1388
on unstable magnetic ordering in Ce 3d compounds and their hydrides, 451
magnetic and structural ordering in the GdH_{2+x} system, 271

Magnetic properties
magnetic properties of $Ca_{2-x}Eu_xRuH_6$ studied by electron paramagnetic resonance, 45

Magnetostriction
hydrogen absorption/deposition studies on some giant magnetostrictive $REFe_2$ alloys and their powder metallurgical processing by hydrogen decrepitation, 1285

Magnets
hydrogen: its use in the processing of ndFeB-type magnets, 1273

Manganese
anelastic relaxation due to hydrogen and deuterium in disordered and ordered Pd_3Mn, 254
characteristics of hydrogen absorption and reactivation of $TiMn_{1.25}Cr_{0.25}$ alloy, 1044
hydrogen-induced ordering in palladium-rich Pd–Mn alloys, 246
relation between equilibrium hydrogen pressure and lattice parameters in pseudobinary Zr–Mn alloy systems, 220
diffusion of hydrogen in disordered and ordered Pd_3Mn as studied using the Gorsky relaxation, 262
Mechanism
Effective thermal conductivity in hydride packed beds
I. Study of basic mechanisms with help of the Bauer and Schlünder model, 1147
Mechanochemical reaction
formation of metal hydride powders and metal–hydrogen amorphous powders of mechanochemical reaction, 153
Membranes
hydrogen permeation characteristics of palladium-plated V–Ni alloy membranes, 727
Metal hydride powders
formation of metal hydride powders and metal–hydrogen amorphous powders of mechanochemical reaction, 153
Metal hydrides
from metal hydrides to the metal–hydrogen system, 8
Metal matrix
thermal conductivity of porous metal matrix hydride compacts, 1138
Metal-hydrogen systems
from metal hydrides to the metal–hydrogen system, 8
hydrogen ordering in metal–hydrogen systems, 237
studies on metal–hydrogen systems (VD_x, NbD_x, $LaNi_5H_x$) using secondary ion mass spectrometry, 95
Metallic properties
metallic properties in the series $K_2Pd(II)H_4$, $Na_2Pd(0)H_2$ and $Li_2Pd(0)H_2$ correlated with the stabilization of a formally zero-valent palladium–hydrogen complex, 36
Metallic surface
multiatom interactions between hydrogen atoms near a metallic surface, 396
Microencapsulation
nickel–metal hydride battery using microencapsulated alloys, 1194
Microstructure
diffusion of hydrogen isotopes as a probe to study the atomic microstructure of metals, 658
influence of the microstructure on hydrogen diffusion in Fe–Zr alloys, 671
Mischmetal
cycling behavior of mischmetal–nickel-based metal hydride electrodes and the effects of copper plating on their performance, 1265
Molybdenum
nuclear magnetic resonance survey of hydrogen motion and electronic structure in α-phase (Nb–Mo)–H alloys, 649
Mössbauer spectroscopy
hydrogenated Fe–Ti superlattices studied by hydrogen depth profiling, Mössbauer spectroscopy and X-ray diffraction, 784
Mössbauer study
^{197}Au Mössbauer study of the hydrides of Ni–Au alloys, 351
^{57}Fe Mössbauer study of the hydrides of Ni–Cu alloys, 343
Mössbauer study of hydrides and deuterides of iron and cobalt, 333
Mössbauer study of the hydrides of Nb_3Me with A15 structure, 358
Multiatom interactions
multiatom interactions between hydrogen atoms near a metallic surface, 395
Muon spin rotation
Muon spin rotation in an Ni–Ti metallic glass hydride, 770
Muons
Transverse field depolarization rates for muons in metals, 762

Neodymium
Hydrogen: its use in the processing of NdFeB-type magnets, 1273
Neutron Compton scattering
kinetic energy of hydrogen in β-V_2H studied by neutron Compton scattering, 301

Neutron diffraction
neutron diffraction studies of domain growth associated with the 50 K anomaly in Pd–D, 169
neutron diffraction studies of deuterated Ti_3P, 206
Neutron quasi-elastic scattering
neutron quasi-elastic scattering from hydrogen in zirconium–nickel metallic glasses, 915
Neutron scattering
inelastic neutron scattering investigation of hydrogen sites in $Y_5Si_3H_x$ ceramics, 307
Neutron vibrational spectroscopy
hydrogen site distribution in the alloy system $Nb_{100-x}V_xH_y$ studied by neutron vibrational spectroscopy, 281
Nickel
^{197}Au Mössbauer study of the hydrides of Ni–Au alloys, 351
^{57}Fe Mössbauer study of the hydrides of Ni–Cu alloys, 343
rechargeable cell based on amorphous Ni–Zr, 1246
catalytic effect of nickel, iron and palladium on hydriding titanium and storage materials, 1076
comparison of the hydrogen absorption process in as-quenched and relaxed $Zr_{50}Ni_{50}$ glassy ribbons, 899
cyclic behaviour of metal hydride electrodes and the cell characteristics of nickel–metal hydride batteries, 1227
decomposition kinetics of palladium nickel hydride, 107
effect of surface contaminations on the hydriding behaviour of $LaNi_5$, 841
effects of partial substitution and anodic oxidation treatment of Zr–V–Ni alloys on electrochemical properties, 1219
effects of radiolytic tritium decay on the thermodynamic behaviour of $LaNi_{4.25}Al_{0.75}$ tritides, 1352
electrochemical measurements of hydrogen diffusion in the intermetallic compound $LaNi_5$, 611
hydrogen diffusion in amorphous Ni–Zr, 922
hydrogen in amorphous Ni–Zr and Ni–Ti alloys, 880
hydrogen permeation characteristics of palladium-plated V–Ni alloy membranes, 727
improved hydrogen storage by Mg and Mg–Ni modified by organic compounds, 1064
influence of binding materials for shaping alloy electrodes on the performance of a Ni/metal hydride battery, 1185
investigation of kinetics and structural changes in $TiFe_{0.8}Ni_{0.2}$ after prolonged cycling, 1036
investigation of $LaNi_5$ after prolonged cycling, 997
localized modes of hydrogen and deuterium in $NiTiH_x$ and $NiTiD_x$, 319
Mg–Zn–Ni hydrogen storage alloys, 1071
muon spin rotation in an Ni–Ti metallic glass hydride, 770
neutron quasi-elastic scattering from hydrogen in zirconium–nickel metallic glasses, 915
nickel–metal hydride battery using microencapsulated alloys, 1194
permeation of hydrogen through nickel foils: surface reaction rates at low temperatures, 718
rare-earth-based alloy electrodes for a nickel–metal hydride battery, 1175
structure of $Y_{0.95}Ni_2$ and its hydride, 198
studies on metal–hydrogen systems (VD_x, NbD_x, $LaNi_5H_x$) using secondary ion mass spectrometry, 95
study of the hydrogen jump geometry in an α-$LaNi_5H_x$ single crystal using quasi-elastic neutron scattering, 595
surface processes of H_2 in the initial activation of $LaNi_5$, 983
cycling behaviour of mischmetal–nickel-based metal hydride electrodes and the effects of copper plating on their performance, 1265
effect of the partial replacement of nickel in $LaNi_5$ hydride with iron, cobalt, and copper on absorption and desorption kinetics, 1009
effects of etching with HCl on the hydrogen sorption properties of Mg_2Ni, 873
thermodynamic properties and cyclic hydriding–dehydriding stability of $LaNi_5$ thin films, 799

Niobium
autocatalytic tritium adsorption in niobium and tantalum at room temperature, 1345

colouration of oxidized niobium surfaces by electrochemical hydrogen charging, 851
deuterium depth distribution in oxidized Zr–2.5wt.%Nb measured by nuclear reaction analysis, 1306
electrical resistance studies of hydrogen diffusion in niobium: an old problem revisited, 699
gettering of hydrogen from Zr–2.5Nb pressure tubes, 1297
hydrogen diffusion in $Nb_{1-y}V_y$ alloys, 624
hydrogen in Nb/Hf/Nb and Nb/Ti/Nb thin films, 792
hydrogen in niobium under pressure, 709
hydrogen site distribution in the alloy system $Nb_{100-x}V_xH_y$ studied by neutron vibrational spectroscopy, 281
low temperature tunnelling and quantum diffusion of hydrogen in $Nb(NH)_x$, 685
Mössbauer study of the hydrides of Nb_3Me with A15 structure, 358
nuclear magnetic resonance survey of hydrogen motion and electronic structure in α-phase (Nb–Mo)–H alloys, 649
quasi-elastic neutron scattering studies of collective and correlated tracer diffusion in the systems α′-NbD_x and α′-NbH_x, 585
studies on metal–hydrogen systems (VD_x, NbD_x, $LaNi_5H_x$) using secondary ion mass spectrometry, 95

Nuclear magnetic dipolar relaxation
nuclear magnetic dipolar relaxation in disordered metal–hydrogen systems, 579

Nuclear quadrupolar relaxation
nuclear quadrupolar relaxation due to hydrogen diffusion in metal–hydrogen systems, 572

Nuclear spin cross-relaxation
novel measurements of nuclear spin cross-relaxation in metal hydrides, 380

Ordering
anelastic relaxation due to hydrogen and deuterium in disordered and ordered Pd_3Mn, 254
hydrogen ordering in metal–hydrogen systems, 237
hydrogen-induced ordering in palladium-rich Pd–Mn alloys, 246
diffusion of hydrogen in disordered and ordered Pd_3Mn as studied using the Gorsky relaxation, 262
magnetic and structural ordering in the GdH_{2+x} system, 271

Organic compounds
improved hydrogen storage by Mg and Mg–Ni modified by organic compounds, 1064

Oxidation
effects of partial substitution and anodic oxidation treatment of Zr–V–Ni alloys on electrochemical properties, 1219

Oxygen
effect of interstitial oxygen on hydrogen solubility in titanium, zirconium and hafnium, 85
hydrogen in YBaCuO films, 419

Pairing
theory of hydrogen pairing in metals, 485
would hydrogen pairing at high temperatures account for nuclear magnetic resonance relaxation anomalies in metal hydrides? 467

Palladium
anelastic relaxation due to hydrogen and deuterium in disordered and ordered Pd_3Mn, 254
calorimetric enthalpies of absorption and desorption of protium and deuterium by palladium, 42
catalytic effect of nickel, iron and palladium on hydriding titanium and storage materials, 1076
comparison of hydrogen diffusion in Ti_2PdH_x with the behavior for Ti_2CuH_x and Zr_2PdH_x, 643
decomposition kinetics of palladium nickel hydride, 107
electrochemical isotherm measurements on the Pd–H and PdAg–H systems, 816
electronic structure and stability of palladium hydrogen (deuterium) systems, $PdH(D)_n$, $1 \leqslant n \leqslant 3$, 1363
frequency-dependent proton spin relaxation in Zr_2PdH_x, 373
hydrogen isotopic exchange in palladium hydride, 1331
hydrogen permeation characteristics of palladium-plated V–Ni alloy membranes, 727
hydrogen solubility in palladium–ytterbium solid solution alloys, 56

hydrogen-induced ordering in palladium-rich Pd–Mn alloys, 246
in situ observation of deuteride formation in palladium foil cathode by X-ray diffraction method, 1381
interaction between two neighboring deuterium atoms in palladium, 1371
metallic properties in the series $K_2Pd(II)H_4$, $Na_2Pd(0)H_2$ and $Li_2Pd(0)H_2$ correlated with the stabilization of a formally zero-valent palladium–hydrogen complex, 36
neutron diffraction studies of domain growth associated with the 50 K anomaly in Pd–D, 169
solubility and diffusivity of hydrogen in palladium and $Pd_{77}Ag_{23}$ containing lattice defects, 747
solubility and diffusivity of hydrogen in amorphous $Pd_{73.2}X_{8.8}Si_{18}$ (X ≡ Ag, Cu, Cr, Fe, Ni) alloys, 890
some pressure–composition and electrical resistivity–composition relationships of the Pd–Sc–H system, 160
surface effects in the reaction of H and D with Pd-macroscopic manifestations, 867
diffusion of hydrogen in disordered and ordered Pd_3Mn as studied using the Gorsky relaxation, 262
thermal desorption spectra of hydrogen from glassy $Pd_{35}Zr_{65}$ and crystalline $PdZr_2$, 928
thermal stability and phase studies of crystalline Zr_2Pd hydrides, 29
uptake and release of hydrogen in palladium by weakly bound sites, 326
PCT curve
new pressure–composition–temperature curve application: potential of the MH electrode, 1236
Permeation
effect of thin copper films on hydrogen permeation through iron, 732
hydrogen permeation and diffusion in Fe–Ti alloys, 740
hydrogen permeation characteristics of palladium-plated V–Ni alloy membranes, 727
permeation of hydrogen through nickel foils: surface reaction rates at low temperatures, 718
Phase diagrams
phase diagram and density modes of deuterium in $NbO_{0.02}$, 1
Phase studies
thermal stability and phase studies of crystalline Zr_2Pd hydrides, 29
Phosphorus
neutron diffraction studies of deuterated Ti_3P, 206
Positive muons
influence of superconductivity on quantum diffusion of the positive muon in aluminium, 759
Potassium
metallic properties in the series $K_2Pd(II)H_4$, $Na_2Pd(0)H_2$ and $Li_2Pd(0)H_2$ correlated with the stabilization of a formally zero-valent palladium–hydrogen complex, 36
two-dimensional metallic hydrogen lattice in potassium–hydrogen–graphite ternary systems, 20
Praseodymium
proton nuclear magnetic resonance study of crystal field levels in praseodymium hydrides, 366
Preparation
preparation and properties of compounds of the complex metal oxides Y_2BaMO_5 (M ≡ Cu, Zn) with added hydrogen, 433
Pressure
hydrogen in niobium under pressure, 709
some pressure–composition and electrical resistivity–composition relationships of the Pd–Sc–H system, 160
Pressure tubes
gettering of hydrogen from Zr–2.5Nb pressure tubes, 1297
Pretreatments
the effects of pretreatments on the catalytic activities of hydrogen storage intermetallics, 1084
Properties
preparation and properties of compounds of the complex metal oxides Y_2BaMO_5 (M ≡ Cu, Zn) with added hydrogen, 433
Protium
calorimetric enthalpies of absorption and desorption of protium and deuterium by palladium, 42
Proton spin relaxation
frequency-dependent proton spin relaxation in Zr_2PdH_x, 373

Quantum diffusion
influence of superconductivity on quantum diffusion of the positive muon in aluminium, 759

low temperature tunnelling and quantum diffusion of hydrogen in $Nb(NH)_x$, 685
quantum diffusion in transition metals, 557
Quantum transition state theory
quantum transition state theory and the diffusion of hydrogen in metals, 529
Quasi-elastic neutron scattering
quasi-elastic neutron scattering studies of collective and correlated tracer diffusion in the systems α'-NbD_x and α'-NbH_x, 585
study of the hydrogen jump geometry in an α-$LaNi_5H_x$ single crystal using quasi-elastic neutron scattering, 595
Rare earths
anomalous hydrogen dynamics in rare earth metals, 496
hydridation of $Re_2Fe_{14}B$ compounds (Re ≡ Nd, Ce, Y, Gd), 144
properties of rare earth dihydrides as reflected in the magnetic behavior of TmH_2, a van Vleck compound, 293
Reaction kinetics
reaction kinetics of H_2 absorption by lanthanum with and without surface oxide layers, 832
reaction kinetics of metal hydrides under quasi-isothermal conditions, 969
Reactivation
characteristics of hydrogen absorption and reactivation of $TiMn_{1.25}Cr_{0.25}$ alloy, 1044
Reactors
design of a new reactor system for the kinetic study of metal hydrides under isothermal conditions, 959
Rechargeable cell
rechargeable cell based on amorphous Ni–Zr, 1246
Relaxation anomalies
would hydrogen pairing at high temperatures account for nuclear magnetic resonance relaxation anomalies in metal hydrides?, 467
Release
uptake and release of hydrogen in palladium by weakly bound sites, 326
Ruthenium
magnetic properties of $Ca_{2-x}Eu_xRuH_6$ studied by electron paramagnetic resonance, 451
Scandium
some pressure–composition and electrical resistivity–composition relationships of the Pd–Sc–H system, 160
internal friction of hydrogen in scandium, 522
Sheet metal
effective thermal conductivity of a metal hydride bed packed in a multiple-waved sheet metal structure, 1130
Silicon
inelastic neutron scattering investigation of hydrogen sites in $Y_5Si_3h_x$ ceramics, 307
Silver
electrochemical isotherm measurements on the Pd–H and PdAg–H systems, 816
solubility and diffusivity of hydrogen in palladium and $Pd_{77}Ag_{23}$ containing lattice defects, 747
Site distribution
hydrogen site distribution in the alloy system $Nb_{100-x}V_xH_y$ studied by neutron vibrational spectroscopy, 281
Sodium
metallic properties in the series $K_2Pd(II)H_4$, $Na_2Pd(0)H_2$ and $Li_2Pd(0)H_2$ correlated with the stabilization of a formally zero-valent palladium–hydrogen complex, 36
Solar-thermal power station
magnesium hydride for thermal energy storage in a small-scale solar–thermal power station, 1111
Solubility
effect of interstitial oxygen of hydrogen solubility in titanium, zirconium and hafnium, 85
effects of prior hydrogen dissolution and hydriding on hydrogen solubility in $LaNi_5$, 1018
hydrogen solubility in palladium–ytterbium solid solution alloys, 56
solubility and diffusivity of hydrogen in palladium and $Pd_{77}Ag_{23}$ containing lattice defects, 747
solubility and diffusivity of hydrogen in amorphous $Pd_{73.2} \times X_{8.8}Si_{18}$ (X ≡ Ag, Cu, Cr, Fe, Ni) alloys, 890
solubility of hydrogen in CsCl-type group Ib–erbium alloys XEr (X ≡ Cu, Ag, Au), 136
Sorption
effects of etching with HCl on the hydrogen sorption properties of Mg_2Ni, 873

Stability
electronic structure and stability of palladium hydrogen (deuterium) systems, $PdH(D)_n$, $1 \leqslant n \leqslant 3$, 1363
intermetallics V–20Ti and FeTi: a transmission electron microscopy study of hydriding reactions and thermodynamic stability, 1058
Stabilization
metallic properties in the series $K_2Pd(II)H_4$, $Na_2Pd(0)H_2$ and $Li_2Pd(0)H_2$ correlated with the stabilization of a formally zero-valent palladium–hydrogen complex, 36
Stoner parameter
calculations of the total energy, electron–phonon interaction and Stoner parameter in the 5d transition metal hydrides, 401
Storage
improved hydrogen storage by Mg and Mg–Ni modified by organic compounds, 1064
magnesium hydride for thermal energy storage in a small-scale solar–thermal power station, 1111
Storage alloys
characteristics of electrodes using amorphous AB_2 hydrogen storage alloys, 1205
Mg–Zn–Ni hydrogen storage alloys, 1071
Storage containers
some engineering methods for eliminating deformation and expansion damage of hydride storage containers, 1168
Storage materials
catalytic effect of nickel, iron and palladium on hydriding titanium and storage materials, 1076
effects of pretreatments on the catalytic activities of hydrogen storage intermetallics, 1084
Structure
comment on "The magnetic and structural ordering in the GdH_{2+x} system" by P. Vadja, J.N. Daou and J. P. Burger, 1388
effect of hydrogen absorption on the structural properties of the hyperstoichiometric alloys $Zr(Mn_{0.72}Fe_{0.28})_{2+x}$, 183
investigation of kinetics and structural changes in $TiFe_{0.8}Ni_{0.2}$ after prolonged cycling, 1036
structural and magnetic behaviour of $LeFe_2H_x$, 191
Substitution
effects of partial substitution and anodic oxidation treatment of Zr–V–Ni alloys on electrochemical properties, 1219
Superconductivity
influence of superconductivity on quantum diffusion of the positive muon in aluminium, 759
Superconductors
static and dynamic dilatation of the high-T_c superconductor $EuBa_2Cu_3O_{7-\delta}H_x$, 425
Superlattices
absorption of hydrogen in superlattices studied by the $^{15}N(^1H, \alpha\gamma)^{12}C$ reaction, 776
Surface analysis
surface analysis of AB_5-type electrodes, 1252
Surface contaminations
effect of surface contaminations on the hydriding behaviour of $LaNi_5$, 841
Surface effects
surface effects in the reaction of H and D with Pd–macroscopic manifestations, 867
Surface interactions
hydrogen surface interactions on clean and on oxidized polycrystalline aluminium and Al 5083 alloy, 859
Surface oxides
reaction kinetics of H_2 absorption by lanthanum with and without surface oxide layers, 832
Surface processes
surface processes of H_2 in the initial activation of $LaNi_5$, 983
Surface reaction rates
permeation of hydrogen through nickel foils: surface reaction rates at low temperatures, 718

Tantalum
autocatalytic tritium adsorption in niobium and tantalum at room temperature, 1345
nuclear magnetic resonance studies of hydrogen and deuterium in tantalum, 631
Thermal conductivity
effective thermal conductivity in hydride packed beds

I. Study of basic mechanisms with help of the Bauer and Schlünder model, 1147
effective thermal conductivity of a metal hydride bed packed in a multiple-waved sheet metal structure, 1130
thermal conductivity of porous metal matrix hydride compacts, 1138
Thermal desorption
hydrogen internal friction peak and thermal desorption spectrum in amorphous $Cu_{5.0}Zr_{50}$, 908
thermal desorption spectra of hydrogen from glassy $Pd_{35}Zr_{65}$ and crystalline $PdZr_2$, 928
Thermal stability
thermal stability and phase studies of crystalline Zr_2Pd hydrides, 29
Thermodynamic properties
thermodynamic properties and cyclic hydriding–dehydriding stability of $LaNi_5$ thin films, 799
Thin films
hydrogen in Nb/Hf/Nb and Nb/Ti/Nb thin films, 792
thermodynamic properties and cyclic hydriding–dehydriding stability of $LaNi_5$ thin films, 799
Thulium
magnetic excitations in Tm–H observed using inelastic neutron scattering, 440
properties of rare earth dihydrides as reflected in the magnetic behavior of TmH_2, a van Vleck compound, 293
Titanium
absorption of hydrogen by vanadium-rich V–Ti-based alloys, 64
catalytic effect of nickel, iron and palladium on hydriding titanium and storage materials, 1076
characteristics of hydrogen absorption and reactivation of $TiMn_{1.25}Cr_{0.25}$ alloy, 1044
comparison of hydrogen diffusion in Ti_2PdH_x with the behavior for Ti_2CuH_x and Zr_2PdH_x, 643
effect of interstitial oxygen on hydrogen solubility in titanium, zirconium and hafnium, 85
effect of O_2, N_2 and CO impurities on the H_2 absorption rate of Ti films at 300 K, 824
hydriding kinetics of $TiFe_{0.5}Co_{0.5}$ compounds, 1052
hydrogen diffusion in f.c.c. TiH_x, 678
hydrogen in amorphous Ni–Zr and Ni–Ti alloys, 880
hydrogen in Nb/Hf/Nb and Nb/Ti/Nb thin films, 792
hydrogen permeation and diffusion in Fe–Ti alloys, 740
hydrogenated Fe–Ti superlattices studied by hydrogen depth profiling, Mössbauer spectroscopy and X-ray diffraction, 784
investigation of kinetics and structural changes in $TiFe_{0.8}Ni_{0.2}$ after prolonged cycling, 1036
localized modes of hydrogen and deuterium in $NiTiH_x$ and $NiTiD_x$, 319
muon spin rotation in an Ni–Ti metallic glass hydride, 770
neutron diffraction studies of deuterated Ti_3P, 206
diffusion of hydrogen in the A-15 compound Ti_3Ir, 693
intermetallics V–20Ti and FeTi: a transmission electron microscopy study of hydriding reactions and thermodynamic stability, 1058
Total energy
calculations of the total energy, electron–phonon interaction and Stoner parameter in the 5d transition metal hydrides, 401
Tracer diffusion
quasi-elastic neutron scattering studies of collective and correlated tracer diffusion in the systems α'-NbD_x and α'-NbH_x, 585
Transition
magnetic resonance determination of the electronic density of state and the metal–non-metal transition in the LaH_2–LaH_3 system, 411
Transition metal complexes
chemical bonding of hydrogen molecules to transition metal complexes, 475
Transition metals
diffusion of hydrogen in transition metals, 538
quantum diffusion in transition metals, 557
Transverse fields
transverse field depolarization rates for muons in metals, 762
Tritium
autocatalytic tritium adsorption in niobium and tantalum at room temperature, 1345

effects of radiolytic tritium decay on the thermodynamic behaviour of $LaNi_{4.25}Al_{0.75}$ tritides, 1352

Uptake
uptake and release of hydrogen in palladium by weakly bound sites, 326

Uranium
hydrogen absorption–desorption properties of UCo, 71
kinetics of the hydriding of uranium metal, 116
linear solution for hydriding of uranium, 124

Vanadium
absorption of hydrogen by vanadium-rich V–Ti-based alloys, 64
effects of partial substitution and anodic oxidation treatment of Zr–V–Ni alloys on electrochemical properties, 1219
hydrogen diffusion in $Nb_{1-y}V_y$ alloys, 624
hydrogen permeation characteristics of palladium-plated V–Ni alloy membranes, 727
hydrogen site distribution in the alloy system $Nb_{100-x}V_xH_y$ studied by neutron vibrational spectroscopy, 281
kinetic energy of hydrogen in β-V_2H studied by neutron Compton scattering, 301
studies on metal–hydrogen systems (VD_x, NbD_x, $LaNi_5H_x$) using secondary ion mass spectrometry, 95
intermetallics V–20Ti and FeTi: a transmission electron microscopy study of hydriding reactions and thermodynamic stability, 1058

X-ray diffraction
hydrogenated Fe–Ti superlattices studied by hydrogen depth profiling, Mössbauer spectroscopy and X-ray diffraction, 784

Ytterbium
hydrogen solubility in palladium–ytterbium solid solution alloys, 56

Yttrium
inelastic neutron scattering investigation of hydrogen sites in $Y_5Si_3H_x$ ceramics, 307
hydrogen in YBaCuO films, 419
preparation and properties of compounds of the complex metal oxides Y_2BaMO_5 ($M \equiv Cu, Zn$) with added hydrogen, 433
structure of $Y_{0.95}Ni_2$ and its hydride, 198

Zinc
Mg–Zn–Ni hydrogen storage alloys, 1071
preparation and properties of compounds of the complex metal oxides Y_2BaMO_5 ($M \equiv Cu, Zn$) with added hydrogen, 433

Zirconium
rechargeable cell based on amorphous Ni–Zr, 1246
comparison of hydrogen diffusion in Ti_2PdH_x with the behavior for Ti_2CuH_x and Zr_2PdH_x, 643
comparison of the hydrogen absorption process in as-quenched and relaxed $Zr_{50}Ni_{50}$ glassy ribbons, 899
deuterium depth distribution in oxidized Zr–2.5wt.%Nb measured by nuclear reaction analysis, 1306
effect of interstitial oxygen of hydrogen solubility in titanium, zirconium and hafnium, 85
effects of partial substitution and anodic oxidation treatment of Zr–V–Ni alloys on electrochemical properties, 1219
frequency-dependent proton spin relaxation in Zr_2PdH_x, 373
gettering of hydrogen from Zr–2.5Nb pressure tubes, 1297
hydrogen diffusion in amorphous Ni–Zr, 922
hydrogen in amorphous Ni–Zr and Ni–Ti alloys, 880
hydrogen internal friction peak and thermal desorption spectrum in amorphous $Cu_{50}Zr_{50}$, 908
influence of the microstructure on hydrogen diffusion in Fe–Zr alloys, 671
neutron quasi-elastic scattering from hydrogen in zirconium–nickel metallic glasses, 915
nuclear magnetic resonance study of hydrogen mobility in Zr_3PD_{3-x}, 618
relation between equilibrium hydrogen pressure and lattice parameters in pseudobinary Zr–Mn alloy systems, 220
thermal desorption spectra of hydrogen from glassy $Pd_{35}Zr_{65}$ and crystalline $PdZr_2$, 928
thermal stability and phase studies of crystalline Zr_2Pd hydrides, 29
